

City of Asheville Open Data Policy Implementation Update

January 9, 2018

Solid Progress on Open Data Infrastructure

- Updated Open Data Portal
 - Users can query data right in the portal, among other enhancements
- Citywide Dashboards
 - Budget, Homelessness, Capital Projects
 - dashboards.ashevillenc.gov
- SimpliCity 2.0
 - Powers citywide dashboards
 - Official beta launch early January

New Data Releases

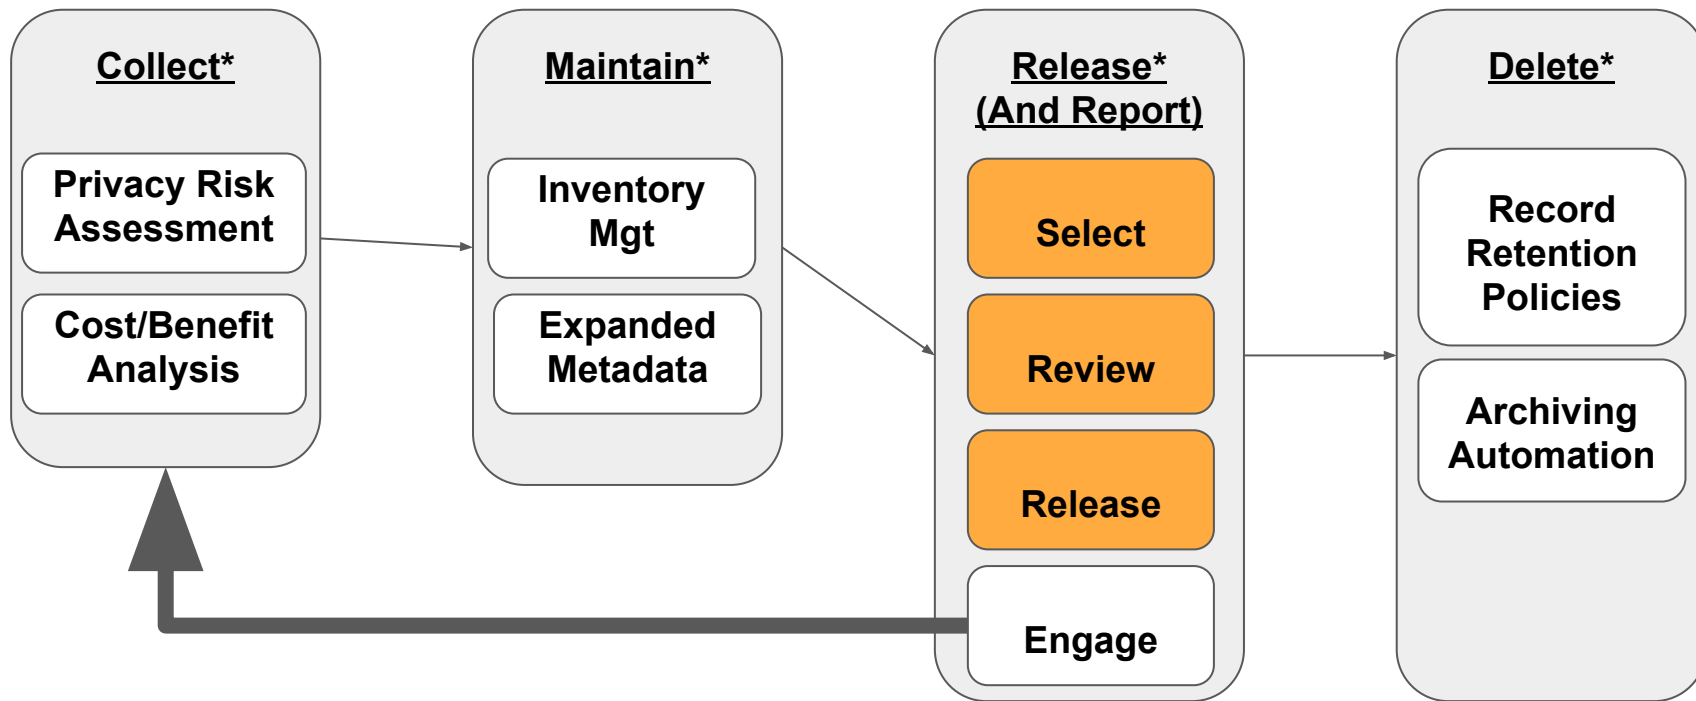

- Hydrants
 - Allows AFD to view hydrant information en route to fire
- Crime Locations
 - Updated using unified City/County representation
- Vendor Payments
- Employee Annual Base Salaries (January 8)

Bloomberg Mayor's Challenge Application

- Addressing Barriers to Minority Business Success
 - Key idea: collaborative data-driven decision-making framework & process
- Builds on Open Data Engagement
 - Proposed framework is a natural extension of our data governance & engagement approaches
- Working with Community Partners
 - Green Opportunities, Pisgah Legal, Carolina Small Business Development Fund

Expanded Governance Model - All Data

* See [Open Data Privacy](#), Berkman Klein Center, Harvard University, 2017.

Some relevant discussion can be found in recent DigitalSimplicity.io posts:
[Shared Data, Shared Systems: Getting Everyone On the Same Page](#),
[Treating Data Like A Strategic Asset](#).

Code for America Leadership

- Jen Pahlka, Open Data & Digital Engagement Thought Leader
 - Founder & Executive Director, Code for America
 - Former Deputy Chief Technology Officer, White House Office of Science and Technology Policy
 - Co-Founder & Architect, U.S. Digital Service
- Met July 13-14 with City Staff, Community Leaders, Code for Asheville
 - Unique opportunity for informal conversation about the challenges we face here in Asheville around data, performance management, and community engagement, how those relate to national trends, and what we can learn from others' work in these areas.
